Project manager, account, web designer.

Education

1999

I.T.C. Martino Bassi

Graduated as Accountant Programmer.

Computer Science and economics.

2000

ENAIP

Programmer and web designer.

Web development, communication, computer science.

Personal skills

I like working as a team to **compare myself** with colleagues and even for taking the **responsibility** of the project. The only way to get a great result both for graphic and technic is working in a team of professionals.

I support my customers every step of the way and I try to interpret correctly the various requirements.

Technical skills

I work both with Mac and Pc, even if I prefer the latter.

For the realization of my projects I use the following softwares:
Flash CS4, Dreamweaver CS4, Fireworks CS4, After Effects CS4, Photoshop CS4, Media Encore, Illustrator CS4, Indesign CS4, Corel Draw X4, Quark X-Press, Word, Office, Excel, Outlook Express, Thunderbird, Skype.

What I prefer is building sites by **Flash** and using videos for easily understandable and immediate communication with the user. This pushed me to study more about **video/web** to increase implemented contents in projects according with the technical specifications of computer networks and factors of video compression in Videostreaming.

I know how to manage the graphic of sites that will be implemented in Asp, Php. Working closely with developers has always been a key element for the creation of an excellent product.

CSS with HTML pages, XML files with SWF files, are important elements of development in my projects.

Other skills

The important part of my job is to be informed about new trends.

I follow with much attention the following portals:
THEFWA.NET - ACTIVE DEN.NET - THECOOLHUNTER.NET
IBELIEVEINADV.COM - DAFONT.COM - FONTSHOP.COM - CSSELITE.COM

Other information

During these years I've also worked like tutor and **teacher** for new employees and interns for private and public **institutions**.

Music, design, history.

I've played for years sports also at competitive levels (especially soccer), now unfortunately my body doesn't stand what my mind wants him to do as once:)
